PRATHIBHA D

Computer Science Engineering Student | AI & Machine Learning | Data Analytics

Bengaluru, Karnataka, India • prathibhaa2006@gmail.com • +91 8073680408 • linkedin.com/in/prathibha • github.com/Prathibha856

PROFILE

Computer Science Engineering student (CGPA: 9.12/10, Department Topper for four consecutive semesters) with strong expertise in AI/ML and Data Analytics. Built high-performance ML models for fraud detection achieving 98% ROC-AUC and full-stack transit platforms processing 15,000+ samples. Completed a Data Analyst internship at Bold Analytics and currently pursuing an AI/ML Professional Certificate from IIT Roorkee (via Intellipaat). Seeking an entry-level AI/ML Engineer or Data Analyst role to gain hands-on industry experience, apply technical skills to real-world problems, and continuously grow in the field of artificial intelligence and data science.

EXPERIENCE

Data Analyst Intern

Bold Analytics (Startup India Registered) | Remote | Apr 2026 – May 2026

- Cleaned and organized business datasets using Excel and Python, improving data quality for downstream analytics.
- Built Power BI dashboards and visualizations for business reporting, enabling faster stakeholder decision-making.
- Performed exploratory data analysis to identify trends and insights; applied statistical analysis techniques to support business decisions.

TECHNICAL PROJECTS

Netflix Recommendation Engine *| Python, Scikit-learn, SVM*

- Architected personalized recommendation engine using SVD and collaborative filtering on 100M+ records; achieved 0.82 NDCG@10.
- Developed scalable ML pipelines for dimensionality reduction and hyperparameter optimization.

Credit Card Fraud Detection *| Python, Scikit-learn, SMOTE*

- Engineered fraud detection pipeline on 284K+ imbalanced transactions (0.17% fraud) using SMOTE-ENN; achieved 98% ROC-AUC.
- Implemented advanced resampling and class-weight balancing to optimize minority class sensitivity.

Customer Churn Prediction *| Python, XGBoost, SHAP*

- Built ensemble model on 7K customer records achieving 86% accuracy; identified tenure and contract type as primary churn drivers.
- Deployed SHAP dashboard enabling projected 22% churn reduction through targeted retention strategies.

BusFlow — Real-Time Bus Tracking & Crowd Management *| Flask, React.js, Random Forest*

- Full-stack GPS tracking system with crowd prediction improving from 55% to 72.4% accuracy using engineered weather/holiday features.
- Real-time heatmaps and ETA for 50+ buses with responsive React dashboard.

Flight Booking System *| Python, Flask, SQL, Pandas*

EDUCATION

B.E. in Computer Science Engineering (AI/ML)

East West College of Engineering

2023 – 2027 Bengaluru, Karnataka

CGPA: **9.12 / 10.00**

Pre-University (PCMB)

Nagarjuna Pre-University College

2021 – 2023 Chikkaballapur, Karnataka

Percentage: **87.8%**

SSLC

Nalanda High School

2020 – 2021 Bengaluru Rural, Karnataka

Percentage: **91.7%**

SKILLS

Machine Learning & AI
Scikit-learn · XGBoost · Random Forest · SVM · TensorFlow · Supervised Learning · Unsupervised Learning · Classification · Regression · Time Series Forecasting · SARIMA · Feature Engineering · Model Evaluation · Predictive Analytics · SMOTE

Deep Learning
ANN · CNN · RNN · LSTM

Data Science & Statistics
Python · Pandas · NumPy · Statsmodels · Statistical Analysis · Hypothesis Testing · ANOVA · Data Preprocessing · EDA · Data Visualization

Web Development
HTML5 · CSS3 · JavaScript · React.js · Flask · REST APIs · API Integration · Deployment

Visualization & BI
Matplotlib · Seaborn · Power BI · Microsoft Excel

Databases
MongoDB · SQL

Tools & Platforms
Git · GitHub · Linux · Jupyter Notebook · Google Colab · VS Code

Programming Languages
Python · Java · C · JavaScript · SQL

Core Computer Science
DSA · OOP · OS

- Analyzed 10K+ flight records for pricing trends; optimized SQL queries from 1.2s to 180ms and built full-stack booking application with secure authentication.

Stellar Stories: Space Weather Through the Eyes of Earthlings | *React.js, NASA APIs*

- Interactive space weather visualizer consuming 6+ NASA APIs with real-time geomagnetic storm tracking and 3D visualization; NASA Space Apps Challenge 2025 participant.

AI Timetable Generation System | *JavaScript, HTML/CSS*

- Automated scheduling tool aligned with NEP 2020; constraint-based algorithm reducing manual effort by 70% with conflict-free scheduling.

Kidrove Workshop Portal | *React.js, Express, MongoDB*

- Full-stack MERN workshop registration platform with RESTful API supporting 200+ concurrent users and real-time registration tracking.

Machine Learning Foundations | *Python, NumPy, Scikit-learn*

- Implemented Linear Regression, Decision Trees, and K-Means from scratch using NumPy; validated against Scikit-learn on Iris and Boston Housing datasets.
- Applied k-fold cross-validation, evaluation metrics, and feature engineering to build a robust ML foundation.

COVID-19 Data Analysis | *Python, Pandas, Matplotlib*

- Analyzed COVID-19 case trends and vaccination data across regions; created visualizations to identify infection patterns and recovery rates.

CERTIFICATIONS

Professional Certificate Programme in Computer Science Engineering (PCP-CSE)

i-Hub Divyasampark, IIT Roorkee (via Intellipaat) | 2025 – 2026

• Comprehensive professional certification covering Data Science, Machine Learning, Deep Learning, and emerging AI technologies

• Hands-on projects and real-world case studies in AI/ML applications

Introduction to IoT — Elite Grade 2024
NPTEL, IIT Kharagpur

Master AI Engineering: Problem Definition to Deployment 2026
Udemy

SQL (Basic) Skill Certification 2025
HackerRank

Python & Java: Master Backend & Frontend Web Dev 2026
Udemy

JavaScript Bootcamp 2025
LetsUpgrade, NSDC & GDG MAD

Industry 4.0 & Industrial IoT — Elite Grade 2025
NPTEL

ACHIEVEMENTS & LEADERSHIP

Department Topper — Four Consecutive Semesters (CGPA 9.12)
Consistent academic excellence and mastery of core CS fundamentals across all semesters of B.E. in Computer Science Engineering.

International Hackathon Participant — NASA Space Apps Challenge 2025 & Bit & Build 2025
Delivered end-to-end software prototypes under time constraints; shortlisted at HackZion V3 in the AI/ML domain.

Mentoring & Community Contribution
Actively support junior students in building projects, understanding algorithms, and developing programming skills.
